

TATENDA CHIDORA

Tatenda Chidora is a Zimbabwean born photographer with a deep love for black and white photography and the dramatic simplicity of the monochrome image. He completed his BTech at Tshwane University of Technology in 2015, and has been busy immersing himself in the Johannesburg production industry through photography assisting and modelling. With a keen eye for spotting uncanny beauty, Tatenda is inspired by the people and spaces he encounters in his daily life. This is evident in his portfolio of striking portraits as well as the introduction of architecture in a series of digitally reworked images.
